Abstract (en)

[origin: EP1410733A1] The mounting comprises a deformable holder (7) and a tab (8) which can be moved in it. The inwardly-curved arm (9) of the holder, rests its ends against the outer edges of the tab. Its outer sides rest against the holding component (3). The tab has two different widths. The larger permits the outer sides to rest against the holding component (3) whilst the smaller permits the mounting with the arms of the holder (7) to pass through the two adjacent holding components (3) on the table panel (2).
