Abstract (en)

[origin: EP1411020A1] Fork lift truck comprises a frame and a battery block arranged within the frame. The frame has a lateral opening for removing the battery block in the horizontal direction, and a support (5) loaded by bending arranged on the upper side of the opening. Preferred Features: The T-shaped support is designed so that it extends on the front or rear side of the opening. The support is rigidly connected in the front region to a holder (6) for a front axle of the fork lift truck and in the rear region to a rear weight of the fork lift truck.
