Abstract (en)
The ground securing device has a fast change unit on the arm of the digger which is fixed to the rest of the plant and a measuring device for establishing the firmness of the securing apparatus on the ground. The measuring device can be attached and removed and is driven by the actuator and is coupled to it. The amplitude/frequency of the actuator is relative to the measurement signal of the measuring unit.

Abstract (de)
Eine Bodenverdichtungsvorrichtung, die mittels einer Schnellwechseleinrichtung am Arm eines Baggers oder dergleichen befestigbar ist und die mindestens einen Schwingungserzeuger und eine Messeinrichtung zur Feststellung des Verdichtungszustandes des Bodens aufweist.
