Abstract (en)  
[origin: EP1411201A2] The fixture is for installation between a pane (2) or panel of a window (1) or door or similar and a frame (3), with on a pane or panel rabbet (9) and an opposing frame rabbet (8), first and second fixture parts (6,7) are fitted. The first fixture part has a basic body (10) on which is held a support part (11), which with the pane or panel closed, supports the second fixture part vertically to the pane or panel main plane. The support part, on the basis of the relative movement of the first and second fixture parts, on closing and/or opening of the pane or panel against the effect of a set-back force crossways to the effective direction of the supporting action, is disconnectable.
