Abstract (en)

[origin: EP1411204A2] The roller blind (1) has a board-type body (2), composed of spaced woven fabrics (3-5) filled with a micro-porous thermal insulation material, and especially silicic acid or an aero gel. The body has a thickness of 3-15 mm, and its interior is evacuated with lamination of a film against gas diffusion. The body can be wound around a shaft (6). Flexible solar cells can be attached to the blind.
