Abstract (en)
[origin: WO03013995A1] The invention relates to a deflection bar for deflecting a material web, comprising a cylindrical jacket (4), which encompasses an inner chamber that can be subjected to a pressurised gas and on which outlets (8) for the pressurised gas are arranged in a specific pattern. An accessory kit for the deflection bar comprises at least one sleeve (7), which can be detachably mounted on the jacket (4). Passages (8) are distributed over at least part of the surface of said sleeve in a pattern that matches that of the outlets.
