Abstract (en)

[origin: WO03009079A2] The invention relates to a method and a device for configuring and/or ordering vehicles for customers according to individual terms. According to the invention, a desired vehicle can be configured and/or optionally ordered according to the requirements and individual terms of the customer by electronically requesting data on said vehicle stored in the central device (1) of a sales person, using decentralised terminal devices (3a, 3b).
