Abstract (en)

[origin: EP1413362A1] The process involves presenting an order for necessary tools in the form of a box assembled on a wall of an enclosure (1). The box includes an electric and pneumatic power distribution unit that is coupled to an electric socket-outlet. An air intake in the box controls the pulverization of equipment of detachable painting. A valve controls the collection of dust extraction of sandpapering. An Independent claim is also included for a cabin used for treatment and preparatory work of an automobile body.
