Abstract (en)

A broadsheet newspaper printing press prints six broadsheets side-by-side has a number of anchorage channels (6) located within the cylinder surface parallel to the axis of rotation. The channels are the anchorage point for rubber blankets around the respective print cylinder. The channels are esp. offset with respect to each other by an angle alpha of approx. 120.

Abstract (de)

Um bei einem sechs stehende Broadsheet-Seiten breiten Druckwerk einer Zeitungsdruckmaschine die Schwingungsanregung durch Spannkänäle niedrig zu halten, sind die jeweils zwei Seiten langen Spannkänäle (4, 5, 6) des Übertragungszylinders (2) in Umfangsrichtung zueinander um jeweils 120° versetzt. <IMAGE>
