Abstract (en)

An ironing machine (100) comprises an heated cylinder (3) for ironing a workpiece (6), a support structure for supporting the ironed workpiece downstream of the heated cylinder and a folding unit for folding a workpiece. The folding unit comprises electrically operated belt (30) for oscillatory motion of the support structure. An independent claim is also included for a method of zigzag folding a workpiece in a folding unit, comprising depositing the workpiece on a support structure while imparting an electrically operated oscillatory movement to the support structure.
