Abstract (en)

[origin: EP1414117A1] The module connects strands of one or more electric lines selectively to contacts in one of the two plug sockets. Both plugs (2,3) are located on opposite ends of a rigid component (4). Each electric line can be taken out laterally between the plugs from the component, which has at least one shaped part (6,7), containing at one end a part of first plug (2), and a part of the other plug (3) at its other end.
