Abstract (en)
[origin: WO03008299A1] The invention concerns a fluid product dispenser comprising: a fluid product reservoir (13) containing the fluid product, said reservoir (13) including a deformable actuating wall (36) which is pressed to reduce the internal volume of the reservoir; and a dispensing orifice (32; 22) through which the fluid product is delivered in the form of a spray by pressure on the actuating wall (36). The invention is characterised in that the reservoir comprises: a base plate (1), and intermediate plate (2) defining an opening (24); and a cover plate (3) including the actuating wall (36), the opening (24) formed in the intermediate plate (2) defining with the base plate (1) and the cover plate (3) the working volume of the reservoir (13).
