Abstract (en)

[origin: WO03002447A1] A lift comprising guide side members (3, 4), which are integrated with a ladder with steps (5), is fixated to a building sections (1) by means of consoles (2) in such a manner that a work zone for persons is defined between the leader, the consoles, and the building section. The invention also comprises a safety arrangement being adapted for preventing accidents if the lift cage (6) because of malfunctioning moves towards a person.
