Abstract (en)  
[origin: WO03014473A1] The invention relates to a travel way for a track-guided vehicle, especially a magnetic levitation railway, comprising a carrier (1) and at least one add-on piece (3) (functional element) which is fixed to the carrier(1) and is used to guide the vehicle. The inventive travel way is characterised in that the add-on piece (3) is connected to the carrier (1) in a frictionally engaged manner and means are provided, in the form of a redundancy system, for an auxiliary non-positive connection.
