Abstract (en)

[origin: WO02103671A2] The invention relates to a method for generating electrical sounds and to an interactive music player. According to the invention, an audio signal in digital format, which lasts for a predeterminable length of time, is used as the starting material. The reproduction position and/or the reproduction direction and/or the reproduction speed of said signal is/are modulated automatically with respect to the rhythm using control information in different predeterminable ways, based on information concerning the musical tempo.
