Abstract (en)

[origin: EP1416108A1] The motor vehicle door lock mounting has a lock control module and a lock spigot (2) attached to the exterior of the door. The lock control module has a rotary sleeve (7) with a collar (8) extending radially. The sleeve has toothed portion (10) driven by a worm gear to move the sleeve between a position in which a lug (6) engages with a seating (9) to lock the sleeve and a position in which the lug is blocked.
