Abstract (en)

[origin: US2004169408A1] A furniture drive for displacing components of a piece of furniture is provided. An adjustment element is pivotably mounted on a main body and serves for displacing a component of a piece of furniture. A drive element is drivingly connected with the adjustment element for displacing the same. A lever gear mechanism is disposed between the drive element and the adjustment element for effecting the driving connection therebetween.
