Abstract (en)
[origin: WO03013562A1] The invention relates to artichoke leaf extracts (Cynarae folium) that are characterized by defined absolute percentages and relative inherent percentages of typical constituents of artichoke leaves such as caffeoyl quinic acids and flavonoids The activity spectrum of the inventive leaf extracts is substantially different from known artichoke leaf extracts, said inventive leaf extracts also being different from each other. The invention also relates to methods for producing the extracts and to fields of application thereof.
