Abstract (en)

[origin: WO03008150A1] The invention relates to a manual machine-tool, especially an eccentric grinding machine, comprising a motor (12) which is arranged in a housing (10) and has a drive shaft (14). Said drive shaft (14) is connected to a grinding plate (16), on the side thereof which is opposite the motor (12), by means of an eccentric (18). Said grinding plate can be placed on an annular, rotatably positioned element (20, 72) which can be braked by a braking means (22, 26). According to the invention, the annular element (20, 72) is positioned in the braking means (22, 62).
