Abstract (en)

[origin: US2004194432A1] A container includes at least one product within the container, the product being secured in the container between an interior surface of the container and a layer of flexible material. The layer of flexible material is skin packaged over the product and adhered to the interior surface of the container by an adhesive. A blank for the container is provided. The blank has panels with a product secured to a panel with layer of flexible material. The invention also relates to a method of packing a product, a method of securing at least one product to a container and a packaging machine for skin packing the product.
