Abstract (en)
[origin: WO03014513A1] The invention relates to a flat structure (4) made from rod-shaped elements (6) extending in a parallel manner with a distance between each other and which are joined together by connecting means (7). Said connecting means (7) can be configured in such manner that they extend over the whole length of the flat structure (4) or alternatively, respectively, link only two adjacent rod-shape elements (6).
