Abstract (en)
[origin: WO03014624A1] The invention relates to a cooking device comprising a housing (1), a cooking chamber (5) which is arranged inside said housing (1) and which can be closed by means of a door (4), in addition to at least one control and display panel (6) which is provided with an optical luminous indication function (8). The inventive cooking device has an easy and clear design. According to the invention, various operating states of the cooking chamber (5) can be displayed by means of the optical luminous indication function (8) of the control panel and display panel (6) for connection and/or disconnection purposes.
