Abstract (en)
[origin: DE10232255A1] Rotary print machine has a feed (6), at least one print mechanism module (101, 201) with a print cylinder (102, 202) and a transfer drum (104, 204), an output (7) and a corona-discharge device (3) for processing of print material in the form of sheets or plates. The corona discharge device is configured so that the print cylinder forms the counter-electrode, with the remaining corona discharge device and the transfer drum forming a separate corona print mechanism module (1). The invention also relates to a corresponding corona print mechanism module.
