Abstract (en)

[origin: EP1418126A1] The wrapping machine (5) includes a band unit (92) comprising a bobbin (16) carrying a wrapping material band (17) carrying wrapping adhesive (18), and a band driving unit (94). A release mechanism (74) enables separation of the band unit and drive unit for replacement of a used wrapping material bobbin. The release mechanism includes a pivoting lever (80) mounted on the driving unit and having a notch in its end that co-operates with a pin (84) on the band unit. An Independent claim is included for a wrapping installation comprising at least one of the above wrapping machines and a conveyor assembly for conveying containers to be wrapped.
