Abstract (en)

In accordance with the present invention, there is provided an apparatus (100) and a method for supporting a radio communication device (114) in receiving and transmitting messages in a first format that is not serviced by said radio communication device. Said apparatus comprises an Interface Manager (102) operable to forward said message to and from said radio communication device (114) on reception and/or transmitting of said message and a Graphic User Interface Manager (112) operable to convert messages from/to said first format. <IMAGE>
