Abstract (en)

[origin: WO03013922A1] The invention relates to a method for determining a fault or a failure in a hydraulic pressure sensor and/or a hydraulic brake circuit in a vehicle brake arrangement comprising a vacuum brake booster. A fault or a failure in a hydraulic pressure sensor and/or a hydraulic brake circuit is determined by comparing the hydraulic pressure or variables derived therefrom with the vacuum pressure situation or the level control of the vacuum brake booster or variables derived therefrom.
