Abstract (en)

[origin: EP1419959A2] The method involves manufacturing a semifinished body for different vehicles in respect of model variants by producing the semifinished body, painting it and then adapting it as required for the selected respective vehicle model variant. Longitudinal and transverse bearer elements are assembled to form a semifinished platform-rear car that is fitted with a base plate (1) with a spare wheel basin (2) and attached to other parts. AN Independent claim is also included for the following: (a) a semifinished body for different vehicles in respect of model variants.
