Abstract (en)

Use is claimed of low molecular protein hydrolysates as inflammation-inhibiting care agents in detergents or cleansing agents, especially in detergents, ironing aids, conditioners or dryer additives. Independent claims are also included for the use of the low molecular protein hydrolysates in the above applications as conditioners which (a) repair and smoothen fibers; (b) cover the fibers and reinforce and protect them; (c) are deposited on the fibers to reduce electrostatic charge; and (d) are deposited on the fibers to reduce dirt redeposition.

Abstract (de)

Die Erfindung befindet sich auf dem Gebiet der Wasch- und Reinigungsmittel und betrifft die Verwendung von niedermolekularen Proteinhydrolysaten als entzündungshemmende Wirkstoffe und als Gewebekonditionierer.
