Abstract (en)

[origin: WO03018269A1] The invention relates to a machine-tool, in particular a drilling and/or chipping hammer. Said machine-tool comprises a percussion mechanism, with a drive bearing (12, 58), rotatably mounted on an intermediate shaft (10) and by means of which a piston (14) can be driven back and forth in the axial direction. According to the invention, said drive bearing (12) is supported on a radial bearing (16) in at least one axial direction on the intermediate shaft (10).
