Abstract (en)

[origin: WO03018424A2] The invention relates to a packaging, especially a commercial packaging, for a plurality of individual products packed in individual packagings. Said packaging is characterised in that each individual packaging comprises a holding section which is connected to a common packaging carrier in a fixed manner and from which a remaining part of each individual packaging can be separated, in order to be separated from the packaging carrier, in such a way that an individual product can be removed from the remaining part.
