Abstract (en)

[origin: WO03018446A1] The invention relates to a transport frame for metal anodes, which is intended for the transport of metal anodes (1) of the type that are essentially sheet-shaped and have at one end a first projection (2) and a second projection (3), the first projection (2) extending from the first side of the metal anode (1) and the second projection (3) extending from the opposite side of the metal anode (1). The transport frame comprises a frame (4) on which the metal anodes (1) are suspendable in such a manner that the metal anodes (1) at least partly hang by the first projection (2) and the second projection (3) on the frame (4). The transport frame also comprises a transport pallet (5) equipped with container sockets (6a; 6b).
