Abstract (en)
[origin: US2002143690A1] Apparatus, methods and articles of manufacture for n-tier transaction execution and processing are shown. The first layer comprises a presentation layer in the form of a user interface for entering instrument orders, modifying orders, and monitoring orders, instruments and markets. The second layer comprises an intermediate component layer for information transfer, and the third layer comprises an information source layer for feeding information to and accepting information from the first two layers.
