Abstract (en)

[origin: WO03019336A2] The present invention discloses systems and methods for facilitating order entry, fulfillment, shipment and payment in a networked environment. In a preferred embodiment, the present invention describes a system for communicating order entries from a seller to a supplier, while providing order status information to the buyer. Also, according to a preferred embodiment of the present invention, a system and method for electronic invoice presentment, dispute resolution and payment in a networked environment is described.
