Abstract (en)

[origin: WO03026318A2] The invention relates to a method for billing a communication service to be provided by a service network, whereby service user access to the service network is achieved by means of an access network connected to the service network. In order to be able to bill the communication services to be provided by such a service network in a simple and reliable manner a service usage request is assigned a code, the service usage request and the code are transmitted from the access network to the service network, a desired service corresponding to the service usage request is provided by the service network using the access network, at least one service-billing message, including the code is sent to a billing unit by the service network and the service billing messages and the access billing messages are recognized by means of the code occurring together with the service usage request and billed together.
