Abstract (en)
The present invention relates to an inhaler for a vacuum cleaner. It is an object of the present invention to easily clean a portion where it is difficult to clean, like the surfaces of furniture, a lower portion of a furniture, a keyboard surface of piano, blinder, etc. by forming an inhaler adapted for forming a vacuum suction force in a Korean inherent broom shape. To achieve the above objects, in a vacuum cleaner which is formed of a body (11) which is adapted for generating a vacuum force based on a fan motor installed therein, a flexible hose (12) which is extended from the body (11), and a detachable inhaler (14) which is inserted to an end portion of the vacuum pipe (13) extended from the flexible hose (12), an inhaler (14) for a vacuum cleaner comprises an insertion portion (14a) which is inserted to an end portion of the vacuum pipe (13), and a suction portion (14b) extended from the insertion portion (14a), wherein the suction portion (14b) and the insertion portion (14a) are extended in a longitudinal direction of the vacuum pipe for thereby implementing a straight line shape of the same. <IMAGE>
