Abstract (en)  
[origin: WO03020233A2] The invention relates to cosmetic and dermatological formulations containing at least one UV-sensitive active ingredient. Said formulations are characterised in that they contain (a) at least one dialkyl naphthalate of the structural formula (I), in which R<1> and R<2> are selected independently of one another from the group containing branched and unbranched alkyl groups comprising between 6 and 24 carbon atoms, and (b) at least one emulsifier, selected from the group of phosphate and/or sulphate emulsifiers. The invention also relates to the use of said formulations.
