Abstract (en)
[origin: WO03021062A1] The invention relates to a door handle comprising a base (1) which is fixed to the door leaf and a grip element which is mounted on said fixing base (1). The grip element comprises a rigid core (3) and a flexible sleeve (5). The inventive device also comprises means (11) for holding the sleeve (5) on the core (3) in order to form the grip element. According to the invention, the sleeve (5) is reversibly fixed to the core using the aforementioned holding means (11) so that said sleeve can be replaced.
