Abstract (en)
[origin: DE10142166A1] Hand instrument for contact free distance measurement has a housing (11) with a housing forward side (15) and rear side (16) at a distance from the front side. The device has two measurement path breakers (21, 22) within a measurement reference plane (18). The means for formation of the second measurement stop (22) comprises a hinged wedge (24) that can be swung out so that its sloping surface (241) forms the second measurement stop.
