Abstract (en)

[origin: WO03021616A1] The invention relates to a switch that is used to open vehicle rear doors or openings comprising means for manually actuating the lock. Said means comprise a plastic or elastomer membrane (3) which is pressed by the user in order to actuate the lock. According to the invention, the plastic or elastomer membrane (3) is at least partially translucent and a light source (5) is housed inside the switch.
