Abstract (en)

[origin: EP1424431A1] A drip valve (20) introduces water into a heated steam chamber (14). A steam pressing iron base (16) has a hole (18) directed at an item of laundry to be ironed for delivering steam (40) flowing from the steam chamber. An air device (22) blows air into the steam chamber and has an air nozzle (24) running into the steam chamber.
