Abstract (en)
[origin: EP1424461A2] Locking arrangement for a container (1), especially an insulating container, consisting of a housing (3) closed by a door (5) comprises a locking device (9) having an actuating element (12) and transferred by this out of a locked into an unlocked position and vice versa. The locking device has at least two locking elements (13) which lock the door to the housing on the side on which it is hinged to the housing and on the opposite side. An Independent claim is also included for a container, especially an insulating container, comprising the above locking arrangement.
