Abstract (en)

[origin: US2004142127A1] The invention relates to a smoke-permeable, seamless, tubular, polyamide-based food casing, comprising a mixture consisting of an aliphatic polyamide and/or an aliphatic copolyamide, an aliphatic and/or partially aromatic polyamide and/or an aliphatic and/or partially aromatic copolyamide, which is modified with glycol or polyglycol, and a bubbling agent. The casing contains bubbles or vacuoles which distinctively improve smoke permeability. Said casing is particularly suitable as artificial casing for smoked sausages.
