Abstract (en)

[origin: WO03022095A1] The invention relates to a device that is used to remove parasites from a hair. The inventive device comprises a handle (1) which supports at least one assembly of combs (7, 8), the teeth (9, 10) of said combs alternating and moving in relation to one another. One of said combs (7) is fixed and the other (8) can move in relation to said fixed comb (7).
