Abstract (en)
[origin: WO03020439A2] Methods and apparatus for masking a planar surface and providing information at the point of use of an assembly including the planar surface are disclosed. In one advantageous method in accordance with the present invention, a masking material comprising a substrate and an adhesive disposed over a first face of the substrate is provided. One or more strips of masking material are applied to a planar surface, and an information bearing sheet is applied over the one or more strips of masking material. In some embodiments, the protective covering comprises a free portion and a fixed portion. The free portion of the protective covering defining a first side of a channel and the face of the pane defining a second side of the channel.
