Abstract (en)  
[origin: WO03025041A1] The invention relates to a hydrophilic or hydrophobic polyurethane that contains on the statistical average at least one olefinically unsaturated structural moiety, selected from the group including lateral, chain or terminal, acyclic and cyclic terpene moieties in the molecule, and to mixed graft polymers of said polyurethane with olefinically unsaturated monomers. The invention also relates to a method for producing the polyurethane and the mixed graft polymers and to the use thereof for producing coating materials, adhesives and sealing compounds.
