Abstract (en)
[origin: WO0243650A2] Systems and methods for providing supplemental interferon to a subject. One disclosed system includes a viral vector capable of infecting a plant and expressing interferon therein and the plant, which is edible. Another disclosed system includes a DNA capable of expressing an interferon gene in a plant and the plant, which is edible and susceptible to transformation by the DNA sequence. Further disclosed is a method including causing a plant to express at least a portion of an interferon gene and feeding at least a portion of the plant to the subject.
