Abstract (en)

[origin: WO03008729A1] A decorative structure is provided that is suspended within a space and includes a flexible panel maintained in a flexed configuration. The decorative structure includes a cable that supports the flexible panel and that is connected to a biasing member. The biasing member cooperates with a portion of the flexible panel to maintain the panel in a flexed configuration. A method of configuring a decorative structure with a flexed panel is also provided.
