Abstract (en)
[origin: WO03024110A1] The invention is a passenger entertainment system comprising a passenger control unit (PCU) that can be simply retained and retrieved from a pocket (12) on an airline seatback (14). A cable retractor for retracting a cable (24) connected to the PCU (10) can be provided at a suitable location, such as underneath the airline seat. The passenger control units (10) can take any of several forms with suitable controls for selecting video channels, audio channels, controlling volume, selecting a menu of options, and the like. The PCU can be used for accessing and sending e-mails.
