Abstract (en)
[origin: EP1426118A1] Production of applicators (10) for cosmetic products, especially foam applicators, comprises placing the applicator in a holder, coating the application surface (18) with an adhesive, applying a foam layer onto the application surface coated with adhesive, and allowing the adhesive to set. Single or repeated opening of through holes is carried out using a pressurized fluid (D) from at least one pressurized fluid source. The holder and/or the pressurized fluid source move relative to each other a specified distance apart. An Independent claim is also included for a device for producing a foam layer on an applicator for cosmetic products. Preferred Features: The pressurized fluid is compressed air.
