Abstract (en)

[origin: EP1426476A2] The attachment system has at least one attachment element (3') on the container (6') for at least one attachment arrangement (2') for the motor and a forward balance weight (9') in the container. The motor has at least one attachment arrangement (12) corresponding to at least one attachment element (13) on the forward balance weight. The balance weight protrudes down below the lower part of the container to form an attachment element for the motor.
